(Optional) Sample Reflection Questions:

In 150 words or less, briefly state up to 5 key ideas that you formulated that the GAI tools alone could not have generated.

I used AI in generating ideas for the group report we have to submit, on what sections must be included , what each of the sections need to contain.

Identify the key facts generated by the GAI tools and briefly describe how you have verified them.

Compared what the AI suggested to include inside the report to what we have inside our github.
